ARTES
c/o Datorteknik
Uppsala University
Box 325
751 05 UPPSALA**Ericsson Utvecklings AB participation in the PAMP project
Categorized and Specialized Caching in SMPs**

We agree to be Uppsala University, Department of Information Technology, industrial partner in the ARTES/PAMP project.

We are currently investigating how open technology can be used in future telecommunication systems. Using components available on the open market, such as industry standard computer systems, to build such systems is important. However there is a miss-match between the some of the properties found in the off-the-shelf components the requirements of our workloads.

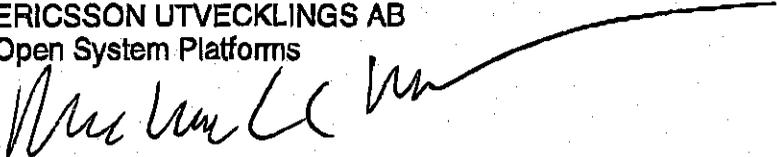

We therefore regard the research direction outlined in the PAMP project proposal "Categorized and Specialized Caching for SMPs" as highly applicable in our effort to use industry standard computer systems. The results from such a project could have a major impact on our future success.

Ericsson Utvecklings AB will:

- * participate in the steering group of the project
- * stay in touch with the ongoing activity in this PAMP project
- * give necessary input to the partner Uppsala University, study their expected results and possibly use them for future servers.

Yours truly,

ERICSSON UTVECKLINGS AB
